BACKGROUND OF INVENTION –OBJECTS AND ADVANTAGES

My invention is to make heels located at the bottom of footwear and imitation footwear more functional. Regardless of what the footwear is being used for bags, decorative or walking, the invention is to go beyond more than it meets the eyes by making a compartment within the heel as a pocket of its own. The heel itself remove "will" replace with -may- be attached at the top part of the heel to the end part to the footwear, include -built directly to the footwear or footwear imitation or built directly to the sole located at the bottom of the footwear or footwear imitation.- Replace "the" with -The- invention is the opening of the heel to gain access to its interior which can be located at any part of the heel. The opening function of the heel can be produced using the same methods used in making normal bottle or any compartment that allows things to be stored within it. Opening and closing methods could be include -any of these method but not limited to-

DETAILED DESCRIPTION OF THE PREFERRED EMBODIMENT

Fig. 1. Is a representation of the prior art footwear and footwear imitation 2 with heel 1. Referring to FIG. 2-4, a footwear and imitation footwear 2 featuring my invention of the multifunctional heel 1A are shown. The heel 1A is the representation of any heel in any shape or form located at the bottom of remove "sole" replace with -a footwear and footwear imitation- 4. FIG. 2. is the closed pocketed heel 1A representation with the line 3 include -(which can be located at any part of the heel)- indicating where it can be opened to gain access to the interior 3A of the heel 1A as depicted in Fig. 3..

Fig. 3. Is a close up view of the multifunctional heel 1A showing the pocketed heel interior 3A in its opened 3 position accessing the interior 3A to store items. The many methods of opening bottles, compartmented objects, cases est. can be used to manufacture the multifunctional heel 1A opening. The heel 1A itself as depicted in Fig. 3 with an inner space 3A within it to allow items to be kept within it, thus creates more additional space 3A for storing belongings and a great hide out for more private items.

Fig. 4. Is a microscopic isolated view of the multifunctional heel 1A indicating the existence of my invention of further compartments or pockets 5 within the pocketed heel
